## 8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

---

**ENGINEERING CONTROLS**

Safety shower and eye bath. Mechanical exhaust required. Handle in accordance with good industrial hygiene and safety practices. Wash hands before breaks and at the end of the workday.

**PERSONAL PROTECTIVE EQUIPMENT**

Respiratory: Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Where protection is desired, use full face respirator type N100 (US) or type P3 (EN 143) as back up to engineering controls. Where risk assessment show sir-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls.

Hand: Compatible chemical-resistant gloves

Eye: Where protection is desired, use chemical safety goggles with side shades conforming to EN166.

Skin and Body: Wear a complete suit protecting against chemicals. Use the proper glove removal technique to avoid contact with material and dispose of contaminated gloves. The type of protective clothing must be chosen based on the concentration and amount of dangerous substances at the specific work place.

**GENERAL HYGIENE MEASURES**

Wash hands thoroughly after handling. Wash contaminated clothing before reuse. Prepare all materials under the fume hood and avoid generating aerosols.
